the 2513

Of the many ways of bringing music to your home, there is none finer than the Scott 2513. Here in one handsome oiled walnut enclosure, Scott has combined its incredibly sensitive AM/FM stereo receiver with the world-renowned Dual 1009F automatic turntable. Matched Scott S-15 three-way air-suspension speakers produce a true full-frequency sound, virtually indistinguishable from the live performance. Once you have enjoyed the performance of the 2513, you will understand why, for over twenty years, Scott has been the unchallenged choice of leading musicians, conductors, and audio authorities.

the foremost Home Stereo System

EASY TO CONNECT: Simply plug in the two matched stereo speakers, and position them wherever they look and sound the best. The 2513 is now ready for your enjoyment.

EASY TO PLAY: Most controls are set just once, to custom-fit the sound to your own tastes and to the acoustic requirements of the room.

EASY TO ENJOY: Hear monaural or stereo records, in any size or speed. Enjoy FM, FM stereo, or sparklingly clear Wideband AM. You can plug in a stereo tape recorder or tape cartridge player . . . connect additional Scott speakers for other rooms, or stereo headphones for private listening. You can even connect a microphone and electric guitar and create your own music.
